

# How to Find Printer IP Address Windows 10

The IP address of the printer can be used to Add a Network Printer and diagnose the cause in case of network issues. You get to install the printer on a different computer or troubleshoot the printer. Locate the IP address on the configuration page or on the Windows computer. Experts suggest printer users to have static IP for a printer. We have described below a few ways to find the IP address of a printer. The methods of finding might vary with the printer model.

## On the Printer

You can find the printer's network IP address from the onboard printer menu. The exact location of the menu varies from printer to printer. It is suggested to refer to the printer's manual to get the exact steps.

- Step 1: Press the Menu or Setup button on the printer.
- Step 2: Use the Arrow buttons to access the networking or network setup option.
- Step 3: Scroll through the wireless networks.
- Step 4: Choose TCP/IP, IP address, Network Status, or Wi-Fi Status to view the IP address settings.
- Step 5: Find the printer's IP address in the list.

## On Windows 10 Computer

- Step 1: Click Start > Control Panel > Hardware and Sound > View Devices and Printers
- Step 2: Right-click the Printer Name > Printer Properties in the Menu screen

- Step 3: Go to General tab Location
- Step 4: The printer's IP address is displayed here.
- Step 5: Or click Ports and then the checked option Printer Port for ...printer.
- Step 6: Widen the window to find the printer's IP address listed.
- Step 7: Or hit Configure Port and find the IP address on the upcoming screen.

## On Windows 10 Settings Screen

- Step 1: Go to the Start button of the Windows 10 computer.
- Step 2: Navigate to the Settings Menu icon and click Devices.
- Step 3: Select Printers & Scanners.
- Step 4: Pick the Printer whose IP address is to be found.
- Step 5: Click Manage.
- Step 6: Access General Location IP address
- Step 7: Or find the address from the Configure Port option.

## With Command Prompt

- Step 1: Type cmd in the search bar of your Windows 10 computer.
- Step 2: Select Command Prompt.
- Step 3: Type `netstat - r`
- Step 4: Hit Enter.
- Step 5: All the devices attached to the computer are displayed.
- Step 6: The IP address can be found next to the printer.
